CADDY® CAT HP J-Hook – CAT32HP (181062)

CADDY® CAT HP J-Hooks are the heart of the CADDY® CAT HP System. The J-Hooks have a wide base design and smooth beveled edges to provide a large bending radius for current and future high-performance data cables and fibre optics. CADDY CAT HP J-Hooks are available in a wide range of sizes to offer a solution that meets industry standards for Cat 6A and easily accommodates Cat 7, large-diameter fibre optic, innerduct and coax cable. Individual CADDY CAT HP J-Hooks can be fastened directly to the building structure or can be used to expand existing CADDY CAT HP J-Hook cable supports. The J-Hooks are designed to provide a strong and stable pathway support installation.

- Provides optimal support for high-performance data cable, up to and including Cat 5e, Cat 6, Cat 6A, Cat 7 and fibre optic
- Rounded edges on J-Hooks provide proper bend radius support for high performance data cables
- Multiple color options aid in the identification and organization of the pathway application
- Provides superior fill capacity and load rating over most other non-continuous cable support alternatives
- Tested according to DIN 4102-12
- Complies with EN 50174-2
- Meets ISO®/IECSM 14763-2, TIASM 568-C and TIASM 569-C
- Painted J-Hooks are low-smoke and halogen-free

APPLICATIONS

EZ Path® Series 22 Fire Rated Pathway is designed for easy installation in walls. Tested and approved cable capacities range from 0 to 100% visual fill. EZ Path® Series 22 Fire Rated Pathway when installed with provided wall plates is designed for new cable installations. In these installations, the device does not require mechanical attachment to either the wall or the wall framing and may be installed after the wallboard has been installed. EZ Path® Series 22's split body design also allows the device to be easily disassembled and installed around previously installed cables in existing construction.

EZ Path® Series 22 Fire Rated Pathway provides exceptional cable capacity. A single unit installed in a wall has an equal cable carrying capacity of a 2" (50 mm) diam sleeve utilizing typical putty firestop systems (35% cable loading).

PRODUCT DESCRIPTION

The EZ Path® Series 22 Fire Rated Pathway is a pathway device designed to allow cables to penetrate fire-rated walls without the need for firestopping. This device features a built-in fire sealing system that automatically adjusts to the amount of cables installed. Once installed in a fire barrier, cables can be easily added or removed at any time without the need to remove or reinstall firestopping materials.

The EZ Path® Series 22 Fire Rated Pathway consists of an enclosed heavy gauge galvanized steel pathway lined with intumescent material engineered for rapid expansion when exposed to fire or high temperatures, quickly sealing the pathway and preventing the passage of flames and smoke.

EZ Path® Series 22 Fire Rated Pathway is painted safety orange for easy identification. Its compact square profile allows a maximum number of cables to be installed in a relatively small area. The pathway measures approximately 1-1/2" x 1-1/2" (37mm) and is 10-1/2" (267 mm) long.

FEATURES

- Easy to install
- No firestopping required
- Firestopped at all stages of use
- UL Tested - Low Leakage!
- UL Classified for the complete range of its capacity
- Match the capacity of a 2" (50 mm) conduit
- Acoustically Tested

FIRESTOP DEVICE CERTIFIED FOR USE IN THROUGH-PENETRATION FIRESTOP SYSTEMS SEE UL ONLINE CERTIFICATIONS DIRECTORY.

PERFORMANCE

EZ Path® Series 22 Fire Rated Pathway is UL Tested and Certified in accordance with ASTM E814 (UL1479) and CAN/ULC S115. Systems are available for common wall construction with ratings up to and including 2 hours.

SPECIFICATIONS

All data, video, and communications cable bundles shall utilize an enclosed fire-rated pathway device wherever said cables penetrate rated walls. The fire-rated pathway shall contain a built-in fire sealing system sufficient to maintain the hourly fire rating of the barrier being penetrated. The self-contained sealing system shall automatically adjust to the installed cable loading and shall permit cables to be installed, removed, or retrofitted without the need to remove or reinstall firestop materials. The pathway shall be UL Certified and tested to the requirements of ASTM E814 (UL1479) and CAN/ULC S115.

INSTALLATION INSTRUCTIONS

UL Classified Systems presently cover installations in framed gypsum board walls as well as masonry walls with ratings of up to 2 hours.

Installation in walls for new cabling installations utilizes one device with provided wall plates and gaskets. Wall plates are secured to pathway using an Allen wrench provided by the manufacturer with each kit. Installation is easily and quickly accomplished using the following steps:

1. Make an opening using a 2" (50 mm) hole saw or measure and cut a nom 1-3/4" (44 mm) square opening through wall.
2. Pre position and fasten wall plate to one side of pathway (see Fig 1) roughly centering pathway within barrier.
3. Slide provided gasket over end of pathway and insert through opening in the wall (See Fig. 2).
4. Working from the opposite side of the wall, install remaining gasket and wall plate to complete the installation.

Wall installation for existing cables

For normal sized openings, the opening is squared off and a single EZD22 pathway is installed in the wall. The periphery is sealed using SpecSeal Firestop Sealant (See Table B: ORDERING INFORMATION).

EZ-PATH® SERIES 33 FIRE RATED PATHWAY

APPLICATIONS

EZ-Path® Series 33 Fire Rated Pathway is designed for easy installation in floors and walls. Tested and approved cable capacities range from 0 to 100% visual fill. EZ-Path® Series 33 Fire Rated Pathway when installed with available wall plates is designed for new cable installations. In these installations, the device does not require mechanical attachment to either the wall or the wall framing and may be installed after the wallboard has been installed. EZ-Path's® split body design also allows the device to be easily disassembled and installed around previously installed cables in existing construction.

EZ-Path® Series 33 Fire Rated Pathway provides exceptional cable capacity. A single unit installed in a wall exceeds the cable carrying capacity of a 4" (102 mm) sleeve utilizing typical putty firestop systems (35% cable loading). Multiple ganged devices utilizing available duplex, or triplex wall plates provide additional capacity or segregation of cables by use, type, installer or vendor as desired.

7', 8' & 9' STANDARD RACKS

The Standard Rack is designed for value conscious, high volume customers, who require the quality and service that sets CPI racks apart from the competition. The Standard Rack is a UL Listed communication circuit accessory designed specifically for use in telecommunications equipment installations where codes require UL Listed equipment racks. For a greater breadth of features, we recommend CPI Universal Racks.

- High strength aluminum construction
- Shipped with (2) top angles, (2) base angles, (2) 3"D (80 mm) equipment channels and assembly hardware
- Top angles allow J-bolt attachment without interfering with the top rack-mount unit space
- EIA-310-D Standard Universal 5/8"-5/8"-1/2" (15.9 mm-15.9 mm-12.7 mm) alternating hole pattern offers greater mounting flexibility and is fully compatible with conventional wide 1 1/4"-1/2" (31.8 mm-12.7 mm) alternating hole patterns
- Six web holes per side enable attachment of vertical cable managers or for multiple racks to be mounted together side by side
- High strength roll-formed threaded equipment mounting holes on the front and rear of the rack channel
- Rack-mount units (U) are marked and numbered to simplify equipment installation
- Includes 50 pilot point #12-24 mounting screws with combination Phillips/Straight heads to reduce cross-threading and installation time
- Integrated masked grounding studs on the inside of the rack channel for quick attachment to the Telecommunications Grounding System
- Computer beige, gray, clear grained, black and glacier white finish provides attractive appearance
- Ships unassembled, individually packaged, with assembly hardware and installation instructions. Bulk packaging is also available
- Redesigned shipping container saves space and freight costs
- Choose from three heights
- Weight capacity of 1000 lb (453.6 kg) — weight must be evenly distributed and rack must be properly secured to the floor
- UL and cUL Listed

CCS COMBINATION CABLING SECTION

The CCS Combination Cabling Section offers the best of CPI's cabling sections, but with added design features. This cabling section is double-sided with the front side featuring plastic cable guides (like those used on the MCS Master Cabling Section,) while the back retains the classic VCS Vertical Cabling Section design.

- 1U cable guides on the front designed for fanning and managing patch cords
- Open cabling section on the rear provides easy access and routes cable bundles feeding into the back of patch panels
- Edge-protected pass through ports make it easy to route cable from front to back; vertical slots along the center separator secure cable bundles neatly with optional Saf-T-Grip® Cable Management Straps
- Plastic Cable Guides meet UL 94V-0 Flame Resistant standards
- Innovative SwitchGate Door/Cover (front) is easily opened from the right or left and can be removed so that cable does not have to thread through guides
- Attach to Standard Racks, Universal Racks, QuadraRack or Adjustable QuadraRack frames
- Mounting hardware and doors are included

Usable Depth
 For 3"D (80 mm) Rack Version:
 Front=5.90" (149.9 mm); Rear=5.35" (135.9 mm)
 For 6"D (150 mm) Rack Version:

Cat 6 Flat 110-Style Patch Panels

APPLICATION

Leviton Cat 6 Flat 110-Style Patch Panels are designed for use on 19-inch standard racks and cabinets. Patch panels include patented Retention Force Technology which promotes consistent performance over the life of the system. Installer-friendly design allows for quick installation due to standard 110 terminations on the rear of the panels which follows the normal installation color sequence (blue, orange, green, brown) from left to right. The Cat 6 system is designed for use in high-megabit applications such as Gigabit Ethernet.

SPECIFICATION

Patch panels shall meet or exceed the requirements for channel- and component-level performance as described in ANSI/TIA-568-C.2 Category 6 standards, as well as the Class E requirements described in ISO/IEC 11801. Panels shall feature both T568A and T568B wiring configurations, white IDC 110-punchdown modules, mounting standoffs for cable management bars, and color-coded front window labeling. Panels shall have universal T568A and T568B wiring card for terminations. Panels shall be made of 14-gauge steel, and shall have a black painted finish with white silk-screening. The plastic elements shall be fire retardant with a UL flammability rating of 94V-0. Panels shall be offered in 12-, 24, 48-, and 96-port configurations as well as an 89D 12-port configuration. Patch panels shall be configured with six port modules. The 110 termination on the rear of the panels shall follow normal installation color sequence (blue, orange, green, brown) from left to right.

COUNTRY OF ORIGIN

USA

FEATURES

- Patented Retention Force Technology protects tines from damage and increases system longevity
- Craft-friendly installation
- Universal T568A and T568B wiring cards for 110-style IDC terminations
- Color-coded front labeling for easy port identification (ANSI/TIA-606-B compliant)
- Terminates 26-22 gauge solid conductors
- Centralized labeling (available on 48-Port) promotes greater visibility of labels when patch cords are routed into horizontal cable management above and below the patch panel
- Capable of multiple re-terminations
- Panel available with patented magnifying lens label holder for easy reading

DESIGN CONSIDERATIONS

- Mounts on 19-inch equipment racks
- Panel offered in 12-, 24-, 48-, 96-port configurations and 12-port U89 Block for wall-mount applications
- Connector modules are in groups of six
- Includes rear cable management bars
- Use star washers for grounding in rack-mount installations

STANDARDS COMPLIANCE

- ANSI/TIA-568-C.2
- ISO/IEC 11801
- ANSI/TIA-1096-A (formerly FCC Part 68)
- cULus Listed
- IEEE 802.3at (Type 1) Power over Ethernet (PoE) applications up to 15.4 watts
- IEEE 802.3at (Type 2) Power over Ethernet (PoE+) applications up to 30 watts
- IEEE 802.3bt/D1.7 (Type 3) Power over Ethernet (PoE+) applications up to 60 watts
- IEEE 802.3bt/D1.7 (Type 4) Power over Ethernet (PoE+) applications up to 100 watts
- Cisco Universal Power Over Ethernet (UPOE) applications up to 60 watts
- Power over HDBaseT™ (POH) applications up to 100 watts

Closet Connector Housing (CCH)

one rack unit, holds two CCH connector panels

CORNING

Closet connector housings (CCHs) provide interconnect or cross-connect capabilities between outside plant, riser or distribution cables and opto-electronics. Like other LANscape solutions hardware, the housings accept CCH connector panels. In addition, the housings accept CCH cassettes and CCH modules.

From fiber and cable routing and strain relief, to port labeling and termination, these housings reduce the risk of error that can disrupt networks.

The units are designed for rack mounting in 19-in (48 cm) racks or optional 23-in (58 cm) equipment racks (1.75-in EIA hole spacing). They are available in rack space options of 1U (two panels, cassettes or modules), 2U (four panels, cassettes or modules), 3U (six panels, cassettes or modules) and 4U (12 panels, cassettes or modules). The 1U, 2U and 3U options feature a slide-out tray and see-through, removable top covers. The CCH-04U features a clear door, removable front and rear enclosures and a platinum-colored interior for maximum visibility and access.

Every CCH housing is shipped complete with strain relief brackets, routing clips and guides, and mounting brackets for proper installation. Documentation labels are provided and components can be added as needed to construct a fiber distribution frame for any application. All housings include a removable tinted polycarbonate front door. All size housings have field-installable lock kits available for both front and rear doors.

All CCH housings can also be upgraded for pigtail splicing to full fiber capacity and easy, modular fiber management through the use of CCH Splice Cassettes (CCH-CS), or for easy, modular fiber management when using field-installable connectors through the use of CCH Slack Cassettes (CCH-CF).

Description

Tripp Lite's RS-1215-20 Power Strip offers 20 amp capacity AC power distribution in a versatile multi-mount cabinet. Detachable mounting flanges are configurable for rackmount, wallmount and under-counter installation. Uses only 1 rack space (1U) when installed in any 19 inch rack meeting EIA standards. Unfiltered electrical pass-through makes RS-1215-20 ideal for distributing alternate waveform UPS or generator power in rack enclosures, network closets and more. Includes 12 NEMA5-20R outlets (6 front/6 rear), 15 ft AC power cord and lighted switch with cover prevents risk of accidental turn-off.

06/15/2021

PLUG/OUTLET: Input: NEMA 5-20P

Output: 12 NEMA5-20R (6 front & 6 rear)

ELECTRICAL: 120V AC, 50/60Hz, 20A (Requires NEMA 5-20R wall receptacle)

FORMAT: 19 in. rackmount (uses 1 rack space/1U), wallmount, under-counter and more

Applications

- Offers multiple outlet power distribution for multiple loads in 19 inch rackmount, wallmount and under-counter applications, such as internetworking, PC systems, telecommunications, audio/video, security, sound reinforcement and more. Ideal for distribution of UPS, generator or commercially derived AC power to protected equipment.

Package Includes

- Warranty information
- Instruction manual

Features

- Versatile all-metal cabinet with detachable mounting flanges allows rackmount, wallmount, undercounter and other creative mounting options
- Uses one rack space (1U) in standard 19 inch rack ("zero U" mounting possible in many racks)
- Unfiltered electrical pass-through reliably distributes alternate waveform AC power from UPS or generator to supported equipment
- 12 NEMA5-20R output receptacles (6 front/6 rear)

- 15 foot AC cord NEMA5-20P plug connection
- Lighted power switch confirms power on/off status
- Snap-in switch guard prevents accidental turn off
- 20 amp electrical capacity with circuit breaker
- 120V AC, 50/60Hz electrical compatibility

Specifications

OUTPUT	
Frequency compatibility	50 / 60 Hz
Circuit Breaker (amps)	20
Outlet quantity / type	12 NEMA 5-15/20R

UNIVERSAL CABLE RUNWAY

Our most popular cable runway is designed for value conscious customers. The Universal Cable Runway offers the industry standard features you've come to expect. With the runway supported every 5' (1.5 m), maximum load with minimal deflection is 132 lb/ft (59.9 kg).

- Made of 3/8" x 1-1/2" x .065" (9.53 mm x 38 mm x 1.65 mm) wall rectangular steel tubing
- Cross members welded at 12" (300 mm) intervals
- Individually boxed to prevent scratches and damage
- Standard length is 9'-11 1/2"/119.5" (3035 mm)
- Underwriters Laboratory Classified for suitability as an equipment grounding conductor only (must remove paint or use ground straps)
- Installation Best Practices includes Runway Elevation Kit

CABLE RUNWAY RADIUS DROP

Mounts to cable stringer or cross member to help maintain proper Category 5/5e/6 or fiber bend radius.

- Quick and easy installation using clevis pin attachment
- Fits 6", 9", 12", 15" and 18" cross member tubing
- For use only with runs on CPI Universal runway (Series 10250)
- Provides 3" bend radius
- Products 5" wide (12100-X06, 12101-X03) drop into CPI's 6" wide vertical cabling sections
- Supplied with 1 1/2" cable spools (P/N 15003-001) to separate and guide cables
- Sold individually

Runway Radius Drop, Cross Member

- May be used on other runway series with Cable Runway Movable Cross Member (12115 series)

TRIANGULAR SUPPORT BRACKET, STEEL

Triangular Support Bracket provides wall support for cable runway. Made of cold rolled steel. Load rating is 400 lb (181.4 kg).

Kit consists of:

- (1) vertical wall-mounting bracket
- (1) runway support channel
- (1) angle support channel
- (3) clevis pins (5/16" diameter) & cotter pins
- (2) 5/16-18 x 2 1/4" J-bolts
- (2) 5/16-18 hex nuts & 5/16 lock washers

RACK SEISMIC GUSSET KIT

Gusset kit can be added to any CPI Universal rack to stiffen critical load-supporting joints. Whenever possible the top of the rack should be stabilized using CPI Bracing Kit (P/N 10562-001).

- Adds additional support to critical rack joints
- Kit can be added to any CPI universal (46XXX series) rack

Gusset kit includes:

- 4 each welded steel bolt-on gussets
- 8 each 1/2-13 x 1-1/4" bolts
- 8 each 1/2-13 nuts

NOTE: Seismic installation requirements should be approved by a licensed structural engineer.

3.3.12 HDI+, HDI-L+, AND HDI DROP IN ANCHORS

PRODUCT DESCRIPTION

HDI+, HDI-L+, and HDI Drop-in anchors

Anchor System	Features and Benefits
	<ul style="list-style-type: none"> Anchor, setting tool and Hilti drill bit form a matched tolerance system to provide reliable fastenings Allows shallow embedment without sacrificing performance Lip allows accurate flush surface setting, independent of hole depth for the HDI-L+ Ideal for repetitive fastenings with threaded rods of equal length
	<ul style="list-style-type: none"> HDI+ and HDI-L+ have an innovative stepped plug that reduces number of hammer blows by up to 50% HDI+ and HDI-L+ can be installed with the new HDI+ Setting Tool system (stop drill bit and machine setting tool) for improved productivity

INSTALLATION INSTRUCTIONS

Manufacturer's Printed Installation Instructions (MPII) are included with each product package. They can also be viewed or downloaded at www.hilti.com. Because of the possibility of changes, always verify that downloaded MPII are current when used. Proper installation is critical to achieve full performance. Training is available on request. Contact Hilti Technical Services for applications and conditions not addressed in the MPII.

UNIVERSAL CABLE RUNWAY

Our most popular cable runway is designed for value conscious customers. The Universal Cable Runway offers the industry standard features you've come to expect. With the runway supported every 5' (1.5 m), maximum load with minimal deflection is 132 lb/ft (59.9 kg).

- Made of 3/8" x 1-1/2" x .065" (9.53 mm x 38 mm x 1.65 mm) wall rectangular steel tubing
- Cross members welded at 12" (300 mm) intervals
- Individually boxed to prevent scratches and damage
- Standard length is 9'-11 1/2"/119.5" (3035 mm)
- Underwriters Laboratory Classified for suitability as an equipment grounding conductor only (must remove paint or use ground straps)
- Installation Best Practices includes Runway Elevation Kit

CABLE RUNWAY RADIUS DROP

Mounts to cable stringer or cross member to help maintain proper Category 5/5e/6 or fiber bend radius.

- Quick and easy installation using clevis pin attachment
- Fits 6", 9", 12", 15" and 18" cross member tubing
- For use only with runs on CPI Universal runway (Series 10250)
- Provides 3" bend radius
- Products 5" wide (12100-X06, 12101-X03) drop into CPI's 6" wide vertical cabling sections
- Supplied with 1 1/2" cable spools (P/N 15003-001) to separate and guide cables
- Sold individually

RACK SEISMIC GUSSET KIT

Gusset kit can be added to any CPI Universal rack to stiffen critical load-supporting joints. Whenever possible the top of the rack should be stabilized using CPI Bracing Kit (P/N 10562-001).

- Adds additional support to critical rack joints
- Kit can be added to any CPI universal (46XXX series) rack

Gusset kit includes:

- 4 each welded steel bolt-on gussets
- 8 each 1/2-13 x 1-1/4" bolts
- 8 each 1/2-13 nuts

NOTE: Seismic installation requirements should be approved by a licensed structural engineer.

ALTOS® All-Dielectric Gel-Free Cables

CORNING

Features and Benefits

Fully waterblocked loose tube gel-free design

Simple access and no clean up

Medium-density polyethylene jacket

Rugged, durable and easy to strip while providing superior protection against UV radiation, fungus, abrasion and other environmental factors

All-dielectric cable construction

Requires no grounding or bonding

Available in 62.5 µm, 50 µm, single-mode (including bend-insensitive and non-zero dispersion shifted fiber (NZ-DSF) options) and hybrid versions

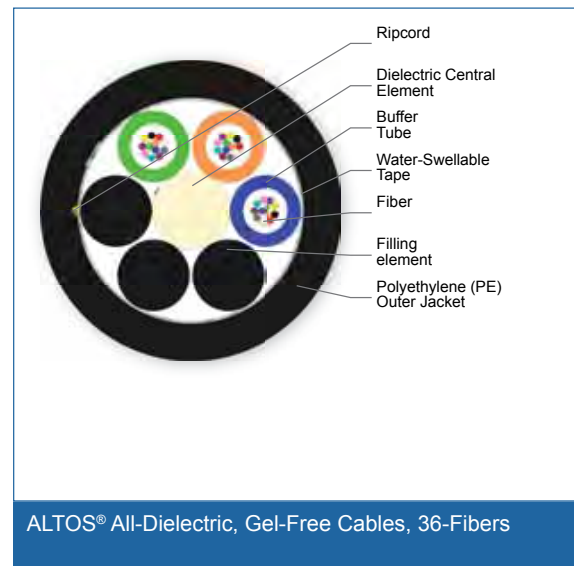

Ready for any application including Gigabit Ethernet and 10 Gigabit Ethernet

Corning Cable Systems ALTOS® All-Dielectric Gel-Free Cables are designed for outdoor and limited indoor use for campus backbones in lashed aerial and duct installations. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swellable materials, which means cable access is simple and no clean up is required. The flexible craft-friendly buffer tubes are easy to route in closures and the SZ-stranded, loose tube design isolates fibers from installation and environmental rigors while allowing easy midspan access. The all-dielectric cable construction requires no bonding or grounding and these cables have a medium-density polyethylene jacket that is rugged, durable and easy to strip.

LANmark-6 Riser Rated

The NEW Berk-Tek LANmark-6 features a reduced diameter compared to other category 6 UTP cables. This is an ANSI/TIA/EIA category 6 verified cable, constructed without the center spline for easy installation and termination. LANmark-6 is capable of transmitting applications such as 1000BASE-T. It is ideal for network applications that extend to 250 MHz. LANmark-6 is available in both CMP and CMR and conforms to ANSI/TIA/EIA 568-B.2-1 Category 6 and ISO/IEC 11801 2nd Edition Class E Category 6 requirements.

Description

Berk-Tek LANmark-6 UTP, Performance Guaranteed

Before any cable can display the **Berk-Tek LANmark-6 UTP** legend, it must pass factory tests with **a minimum of 2dB of crosstalk margin beyond the CAT 6 standard for NEXT, PSNEXT, ACR and PSACR**. If the margin is missing, so is the legend. That is our guarantee to you.

Your business demands continuous performance from your IT network, so our specifications aren't simply numbers on the page. They define the way that we do business. This means that you are **guaranteed** industry-leading performance and quality for all Berk-Tek products.

Some other manufacturers talk about "typical" values, at Berk-Tek, we hold ourselves to a higher standard. We won't talk about typicals, we talk about what is true, guaranteed, and independently verified.

Keep your business running by relying on Berk-Tek.

Perform Beyond Expectations... Choose Berk-Tek.

Construction: 23 AWG bare copper wire insulated with high density polyethylene. Two insulated conductors twisted together to form a pair and four such pairs cabled to form the basic unit, jacketed with flame-retardant PVC.

Flame Rating: Riser - NFPA 70, CMR

Features

- Inexpensive compact design
- Meets the requirements of ANSI/TIA/EIA-568-C.2
- Usable bandwidth up to 250 MHz
- Delivered in compact, strong, easy to identify boxes
- RoHS Compliant

Benefits

- Provides Category 6 performance
- Cost effective entry level category 6 solution
- Provides additional usable bandwidth required for future applications
- Superior box design allows cable to be pulled easily from the box with minimum kinking
- Compact box design takes up less shelf space.
- Clearly identified packaging eliminates potential confusion

District standards require fusion spliced connectors.

Corning Cable Systems Anaerobic-Cure Connectors offer optical performance in a fast, easy field-termination solution designed for fiber-to-the-workstation applications for single-mode and multimode connections. This connector combines the quick-cure convenience of anaerobic adhesive with the performance of epoxy and polish connectors. Ideal for enterprise networks and any installations requiring field-installed connectors, the anaerobic cure technology enables fiber optic networks to be installed cost effectively with minimal tools. Installation of the connector can be accomplished in minutes with the anaerobic adhesive two-part epoxy process. The adhesive is first injected into the connector ferrule and then the fiber is dipped into the primer and inserted into the connector. Curing takes only one minute without the use of lamps or ovens. With the hand-polish process, an average insertion loss of 0.2 dB is achieved.

LANmark-1000 Category 6 Riser

LANmark-1000 has been improved to offer best-in-class electrical performance. Berk-Tek's engineers completely redesigned LANmark-1000 so that all crosstalk parameters could be improved by four dB. As a result, the Power Sum Attenuation to Crosstalk ratio (PSACR) is nearly 3 times better (at 250 MHz) allowing for much greater signal strength and less vulnerability to noise interference. At Berk-Tek, we understand that your business runs through us.

Description

Construction

23 AWG bare copper wire insulated with polyethylene. Two insulated conductors twisted together to form a pair and four such pairs laid up with crossfiller to form the basic unit, jacketed with flame-retardant PVC.

Standards

North American: ANSI/TIA/EIA-568-B.2-1 Category 6, UL 444 and C22.2 No. 214-02

International: ISO/IEC 11801-2nd Edition Category 6, EU Directive 2002/95/EC (RoHS)

Flame Rating

Riser - UL 1666, CMR, IEC 332-1, UL Listed

Applications

Berk-Tek's LANmark-1000 UTP cable is intended for high speed data applications including:

- IEEE 802.3 1000BASE-T 1 Gb/s
- TIA/EIA-854 1000BASE-TX 1 Gb/s
- ATM 155 Mb/s 155 Mb/s
- IEEE 802.3 100BASE-TX 100 Mb/s
- CDDI 100 Mb/s
- IEEE 802.3 10BASE-T 10 Mb/s

Features

- Full Power Sum Performance
- Documented balance characteristics (LCL, LCTL)
- ETL verified to ANSI/TIA/EIA-568-B.2-1 Category 6 standard

Benefits

- Optimal support for Gigabit Ethernet with headroom
- Power sum characterization gives highest performance using existing applications
- Provides additional bandwidth required for future applications
- Addition of balance requirements improves overall cable performance and reduces cable emissions which results in reduced transmission errors
- Characterized to 550 MHz, 300 MHz greater than the standard

eXtreme® Cat 6 UTP Patch Cord

APPLICATION

Leviton eXtreme Cat 6 patch cords are designed to be used in typical Cat 6 channel applications. Leviton eXtreme Cat 6 systems are designed for use in high-bandwidth applications such as Gigabit Ethernet.

SPECIFICATION

Patch cords shall meet or exceed requirements for Cat 6 performance described in ANSI/TIA-568-C.2. Patch cords shall be stranded conductor with an 8-position modular plug on each end. The cords shall be available in standard lengths of 1, 3, 5, 7, 10, 15, and 20 feet. Patch cord plug shall be clear and contacts shall have industry-standard, ANSI/TIA-1096-A compliant 50 micro inches of gold plating.

FEATURES

- Stranded conductor for longer flex-life
- T568B wiring to function in either T568A or T568B applications
- Color-matched cords and boots

DESIGN CONSIDERATIONS

- ANSI/TIA channel performance limits the total length of work area and equipment room cords to 32 feet (10 meters) per ANSI/TIA-568-C.2 or 88.6 feet (27 meters) in a MUTOA application
- A variety of colors for color coding and organizing
- Available in six standard lengths
- Color-matched rubber boot provides protection for plug

STANDARDS COMPLIANCE

- ANSI/TIA-568-C.2
- ISO/IEC 11801-B
- ANSI/TIA-1096-A
- cULus Listed
- UL 444 CM rated
- Supports IEEE 802.3af, 802.3at, and Cisco UPoE up to 60 watts
- Supports emerging PoE standards such as the draft IEEE 802.3bt, up to 100 watts; with bundle sizes of 100 cords or less

PERFORMANCE SPECIFICATIONS

Dimensions	See page two
Outer Diameter (O.D.):	0.225"
Materials:	Plug body is high-impact, fire-retardant plastic rated UL 94V-0
Color:	White, Grey, Black, Blue, Red, Yellow, Green (Matching color boots)

eXtreme® Cat 6 Component-Rated UTP QuickPort® Connector

APPLICATION

The eXtreme Cat 6 connector is designed to be used with all QuickPort compatible products. The connector includes patented Retention Force Technology which promotes consistent performance over the life of the system. It features unique pair separation towers allowing for quicker and easier terminations. The connector is built on a 180-degree configuration with the punch field in the back, allowing for rear termination.

SPECIFICATION

The connector shall meet or exceed the requirements for channel- and component-level performance as described in ANSI/TIA-568-C.2 Category 6 standards, as well as the Class E requirements described in ISO/IEC 11801. The connector shall be individual snap-in style. The connectors shall also be in compliance with all National Electrical Codes; compliant with ANSI/TIA-1096-A; UL listed; and independently verified. In addition to Category 6 compliance, the connector shall have the ability to support high-megabit and shared-sheath applications. All plastics used in construction of the connector bodies shall be fire retardant with a UL flammability rating of 94V-0. Termination of all connectors shall be 110-type insulation displacement connectors (IDC). The connector shall provide a ledge directly adjacent to the 110-style termination against which the wires can be terminated and cut in one action by the installation craftsperson. Connector wiring is universal and will accommodate installation color codes for T568A and T568B wiring schemes. The termination field shall be in the rear for easy access. The connector shall fit in a variety of telecommunications wallplates, outlets, and field-configurable patch panels and patch blocks.

FEATURES

- Terminates 26-22 gauge solid conductors
- Capable of multiple re-terminations
- Gas-tight IDC connectors prevent corrosion
- Dual-layer T568B/T568A wiring label simplifies punchdown
- Patented Retention Force Technology protects tines from damage and increases system longevity
- Pair Separation Tower design facilitates separation of conductors and minimizes untwisting
- 180-degree configuration allows for rear termination
- Available in 13 ANSI/TIA-606-B compatible colors for color coding or organization
- Available individually, in bulk packages of 25, and in bulk packages of 150 with a JackRapid™ Punchdown Tool

DESIGN CONSIDERATIONS

- Use in any QuickPort housing to support eXtreme Cat 6 UTP connectivity in surface-mount, flush-mount, or modular furniture outlets and field-configurable panels
- Can be used in conjunction with other QuickPort snap-in modules for voice/data and video applications over UTP, coax, and fiber

STANDARDS COMPLIANCE

- ANSI/TIA-568-C.2
- ISO/IEC 11801
- ANSI/TIA-1096-A (formerly FCC Part 68)

Single-Gang QuickPort® Wallplates

41080-xxP

APPLICATION

Single-Gang QuickPort Wallplates accept QuickPort connectors to support multimedia applications with 1, 2, 3, 4, or 6 ports. Use where a one-piece, single-gang, economical flush-mount housing is desired. Available in six colors (white, light almond, ivory, grey, brown, and black) with color-matched screws.

SPECIFICATION

The wallplate housing shall be a one-piece, single-gang flush-mount style that fits standard NEMA openings, or four-square boxes with reducer. It should provide 1, 2, 3, 4, or 6 ports. Must be able to accept all Leviton QuickPort connectors. It must be made of high-impact, fire-retardant plastic rated UL 94V-0, and be cULus Listed, and compliant with ANSI/TIA-568-C.0 specifications. The wallplate shall accommodate low-voltage box eliminators for a flush mount.

FEATURES

- Color-matched wallplate screws
- Fits within minimum rectangular NEMA openings and accommodates low-voltage box eliminators for a flush mount
- Compatible with all individual QuickPort connectors
- Individual port configurability allows specification flexibility
- Narrow module width allows high port density in a small area

DESIGN CONSIDERATIONS

- Fits single-gang back boxes, or four-square boxes with appropriate user-provided reducer
- Put blanks in unused ports for future expansion
- Specify port identification method (colored modules, designation labels, and custom silk-screening available/to identify ports, use different colored connectors for each application or Leviton pre-printed Port Designation Labels (41080-LEB)

STANDARDS COMPLIANCE

- cULus Listed (UL 1863 & CAN/CSA-C22.2 No. 182.4)
- ANSI/TIA-568-C.0

PHYSICAL SPECIFICATIONS

- Dimensions: See page two
- Materials: High-impact, durable, fire-retardant plastic rated UL 94V-0
- Capacity: Available in 1-, 2-, 3-, 4-, and 6-port versions
- Mounting: Color-matched screws

Hook and Loop Cable Ties

The comprehensive family of hook and loop cable ties delivers reliability by protecting against over-tensioning of high-performance fiber and copper cables. These ties are adjustable, releasable, and reusable to effectively support frequent moves, adds, and changes (MACs). A wide range of designs, sizes, and colors provides flexibility and an aesthetically pleasing appearance.

Checking is only for general conformance with the design concept of the project and general compliance with the information given in the contract documents. Any action subject to the requirements of the Plans and specifications. Contractor is responsible for: Dimensions, which shall be confirmed and correlated at the job site; all construction processes and techniques of installation; coordination of his work with that of all other trades; and the satisfactory performance of his work.

Key Features

Benefits

Soft hook and loop material	Reliability – Safe way to effectively bundle cables while maintaining network data integrity by protecting against over-tensioning; minimal installation time; no tools required
Releasable design	Scalability – Adjustable, releasable, and reusable to accommodate frequent moves, adds, and changes (MACs) which supports evolving changes to equipment and cabling for future growth; supports rapid deployment
Wide range of designs, sizes, and colors	Aesthetics – Allows design flexibility and provides a professional, finished appearance
Plenum rated styles	UL listed cable ties can be safely applied in plenum or air handling spaces per NEC, Section 300-22 (C) and (D)
Pre-cut, perforated, or continuous roll ties	Allows choices to fit any individual need
Comprehensive product offering	Supports a wide range of applications; allows maximum installation flexibility

Tak-Ty® Loop Ties
Slot allows for pre-wrapping of bundles

Tak-Ty® Strip Ties
Rolls perforated in convenient 6", 8", or 12" strips

Tak-Ty® Stacked Strips

Ultra-Cinch™ Hook & Loop Cable Ties

- Soft, premium material is safe to use on high-performance cabling
- Adjustable, releasable, and reusable multiple times
- Unique material with hooks and loops on same side allows user to secure a greater range of bundle diameters, including smaller diameter bundles
- Low-profile, contoured cinch ring provides extra strength and bundle tightness, while reducing overall bundle size
- Grommet styles offer strength and assure reliable installations that resist pullout when bundling and mounting cables within cabinet applications
- Tapered tip facilitates easy, snag-free threading
- A full range of colors; see Color Chart on page 4

Premium, compact large-venue laser projector with 4K Enhancement¹

The powerful Pro L1070UNL, part of Epson's most compact interchangeable-lens laser projector series, offers 3-chip 3LCD technology and native WUXGA resolution with 4K Enhancement Technology¹ (1920 x 1200 x 2). Delivering extraordinary color brightness, Epson® 3LCD projectors ensure brilliant images. Providing 7,000 lumens of color brightness and 7,000 lumens of white brightness², the L1070UNL's laser light source and air filter offer virtually maintenance-free operation up to 20,000 hours³. With a high contrast ratio and BT.709 color space, it produces sharp, true-to-life images. And, it offers 11 optional interchangeable lenses.

Model: V11H940920

Overview

AUDIO INNOVATION BEYOND COMPARE.

Multiple patents – more than any of our competitors combined. Historical audio achievements. Innovative technical advances.

Crown's world-renowned reputation for excellence – built by 65 years of uninterrupted achievements in sound – continues with the introduction of the next generation of installed sound amplifiers featuring **DriveCore™ Technology**.

The culmination of nearly two decades of R&D in PWM and switch-mode amplification, DriveCore seamlessly integrates the amplifier drive stage into the power output stage and fuses everything into one very, tiny but extremely powerful chip.

This single, revolutionary chip allows us to replace 500 parts per channel pair, greatly reducing design complexity compared to that of traditional amplifiers while creating more efficiencies, long-term reliability and unsurpassed performance.

DCi 4|600 | 4X600W

A DCi 4|600 **delivers more than twice the power** while **using just half the space** of a CTs 4200 – **with almost half the current draw** – and drives 100Vrms lines at 600W.

A REVOLUTION IN INNOVATION.

As the undisputed leader in sound amplification, Crown builds on its legacy of innovation and insight with the industry's first 100V direct drive amp: the **DriveCore™ Install Amplifier Series (DCi)**.

The ideal choice for everything from meeting rooms to massive stadiums, the highly efficient DCi Series saves you time because it configures quickly and is simple to use. Plus, its lighter, **space-saving design** makes it easy to install wherever you want.

Designed, engineered and manufactured to the industry's highest quality standards for analog or network installations, the DCi Series provides system integrators with **effortless, unmatched performance** time after time.

A SOUND DIFFERENCE YOU CAN SEE.

Actual Size

Designed for **minimum size** and **maximum power**, DriveCore offers greater accuracy, reduced weight, and best-in-class signal-to-noise performance.

The front-end drive circuits leverage the **inherent efficiency** of Class D output stages while also maintaining **superb sonic characteristics**.

DriveCore means the patented feedback and PWM circuits provide fast recovery on peak transients, accurate reproduction of low-level detail and precise tracking of low frequencies at all power levels. Plus, fewer parts results in **increased reliability** – and the legendary performance you expect from Crown.

With extremely wide tolerance for AC line conditions, whether you're on a normal power grid or fluctuating back-up generator power for Life-Safety systems, DriveCore amps deliver sound that's never compromised.

A proprietary hybrid analog-digital integrated circuit that's bolstered by multiple patents, DriveCore leads a new era of sustainable excellence. It also represents another historic milestone in our ongoing commitment to delivering audio products demanded by professionals – and that please audiences worldwide.

GREENEDGE™ TECHNOLOGY The DCi Series is a direct result of this HARMAN initiative designed to increase performance and acoustic qualities while dramatically reducing energy consumption. With the DriveCore chip replacing over 500 parts, it requires far fewer materials while easily delivering more than 90% efficiency. The Powersave feature provides additional energy savings with an Auto-Standby mode that powers down the amp to consume less than 1W. Plus, using recycled cardboard boxes to ship DCi units further reduces our carbon footprint.

Network Back Panel

NETWORKING MADE EASY Since the introduction of the first IQ system in 1992, Crown has deployed more networked audio systems than all other amplifier manufacturers combined. This pedigree continues today with the DCi Series amplifier. Adhering to exact TCP/IP Ethernet standards and equipped with HiQnet™ technology, the DCi Series amplifier can live on a standard network without the hassle of proprietary switches or hardware. And by following standard protocol, large systems of 400+ amplifiers can be quickly deployed on a single network backbone without any special considerations.

DCi NETWORK DISPLAY SERIES

AVB Certified - The DCi Network Display Series is AVB Certified by the AVnu Alliance®.

AUDIO NETWORKING AS EASY AS A, B, C, D. - DCi Network Amplifiers are the most flexible amplifiers yet. Effortlessly pair up any DCi Network amplifier with one of BSS Audio's Soundweb London™ processors for a system solution that can process any type of audio networking transport.

A - Process AVB audio signals through the Soundweb London BLU-805 or BLU-325 via BLU-Link into any DCi Network amplifier.

B - BLU-Link capabilities make DriveCore Install Network amplifiers and Soundweb London Processors the end-all system solution for everyone.

C - Process CobraNet audio signals through the Soundweb London BLU-800 or BLU-320 via BLU-Link into any DCi Network amplifier.

D - Process Dante audio signals through the Soundweb London BLU-806, BLU-326, or BLU-DAN via BLU link into any DCi Network amplifier.

DSP

DIGITAL SIGNAL PROCESSING Crown's legendary DSP, combined with DCi's true rack density design, provides the flexibility and design tools for wide-ranging jobs while outperforming many of the world's stand-alone loudspeaker processors. With LevelMAX™, input and output EQ, delay, pilot tone monitoring and tone generators, the DSP-enabled DCi amplifiers are packed with features that can be used worldwide. Combining DSP with network monitoring and control gives consultants, engineers and end users enormous flexibility.

DCi NETWORK SERIES

TRUE RACK DENSITY – Power points of 300W or 600W in 2-/4-/8-channel configurations, or 1250W/2400W in 2-/4-channel configurations – all in a 2 Rack Unit form factor.

ANALOG & DIGITAL INPUTS – With digital audio transport via HARMAN's proprietary BLU link, plus balanced analog inputs, DCi gives you a tremendous audio advantage – at a much lower cost. The priority input router allows you to specify a primary input, and if audio is lost the amp automatically switches to the other input.

NETWORK MONITORING & CONTROL – Better monitoring, control and audio manipulation with the HiQnet™ protocol over standard TCP/IP. Remotely see how all networked DCi amplifiers are performing and control them as needed. In addition, this allows Audio Architect software and the Powered by Crown app to work with DCi amplifiers.

PROGRAMMABLE GENERAL PURPOSE INPUT/OUTPUT PORTS – GPIO ports can be configured in many different ways, such as volume controls, recall presets, or to report errors to a 3rd-party system.

DIGITAL SIGNAL PROCESSING – DSP capabilities include the following:

- › LevelMAX™ Limiters
- › Input/Output EQ
- › Delay
- › Matrix Mixer
- › Speaker Line Monitoring
- › FIR Crossover

AUDIO NETWORKING AS EASY AS A, B, C, D. – DCi Network Amplifiers are the most flexible amplifiers yet. Effortlessly pair up any DCi Network amplifier with one of BSS Audio's Soundweb London™ processors for a system solution that can process any type of audio networking transport.

DCi ANALOG SERIES

TRUE RACK DENSITY – Power points of 600W in a 8-channel configuration or 1250W in a 4-channel configuration – all in a 2 Rack Unit form factor. More channels in one box allow smaller infrastructure rooms that can reduce operational costs while giving you the utmost in installation flexibility.

DIRECT DRIVE CONSTANT VOLTAGE – Save money by using smaller gauge wiring to drive the speakers using either 70Vrms or 100Vrms. With no need for a step-up transformer at the output, the DCi produces higher audio quality much more efficiently.

CHANNEL INDEPENDENT HI-Z/LOW-Z SELECTION – Drive either one or two speakers in low-Z mode, or literally hundreds of speakers in high-Z mode (70Vrms or 100Vrms). This means better design flexibility since DCi powers all loads on a channel-by-channel basis.

BRIDGEABLE CHANNEL PAIRS – Unlike amps from other manufacturers, the DCi Series channels are bridgeable – even in 100Vrms mode – which means even more adaptability for higher power applications such as subwoofers.

REMOTE ON/OFF INTERFACE – Save power by integrating the amplifier into a control system so you can easily turn it on and off.

EFFICIENT COOLING DESIGN – Highly efficient internal cooling fans provide airflow to the most heat-generating parts. Incorporating the fans into the amplifier brick design maximizes cooling while minimizing wasted energy and noise.

ADVANCED POWER FACTOR CORRECTION (PFC)

UNIVERSAL POWER SUPPLY – The most advanced power supply in an installation amplifier delivers power more efficiently in almost any condition than anyone else, resulting in less power dissipated and less heat in your racks.

POWERED BY CROWN Crown's "Powered by Crown" app allows wireless control and monitoring of your DCi Network Series Amp or any Ethernet-enabled devices from Crown. Using the same protocols as HiQnet System Architect™, you can import custom control panels, set limits, or make adjustments anywhere in the venue using only your iPhone or iPad.

INDUSTRY-LEADING WARRANTY

Crown offers a three-year, no-fault, fully transferable warranty on every new DCi Series amplifier we make – an unsurpassed industry standard. With this industry-leading no-fault protection, your DCi Series amplifier is warranted to meet or exceed original specifications for the first three years of ownership. If it doesn't, it will be repaired or replaced at our expense. (Outside of the US, please contact the Crown authorized distributor in your country for more details).

DATA SHEET

TESIRAFORTÉ® AI

FIXED I/O DSP

TesiraFORTÉ® AI is a fixed I/O DSP with 12 analog inputs and 8 analog outputs and includes up to 8 channels of configurable USB audio. USB audio allows TesiraFORTÉ to interface directly with USB audio hosts, as well as to take full advantage of today's most sophisticated conferencing solutions. TesiraFORTÉ AI also provides extensive audio processing, including but not limited to: signal routing and mixing, equalization, filtering, dynamics, and delay, as well as control, monitoring, and diagnostic tools; all configured through the Tesira configuration software. TesiraFORTÉ AI is best-suited for small- to medium-sized rooms that require high-quality audio solutions using voice lift and mix-minus, such as conference rooms or council chambers.

FEATURES

- 12 mic/line level inputs, 8 mic/line level outputs
- Gigabit Ethernet port
- Up to 8 channels of configurable USB audio
- RS-232 serial port
- 4-pin GPIO
- 2-line OLED display with capacitive-touch navigation
- Rack mountable (1RU)
- Supports port authentication via IEEE 802.1X
- System configuration and control via Ethernet
- Internal universal power supply
- Signal processing via intuitive software allows configuration and control for signal routing, mixing, equalization, filtering, delay and much more
- CE marked, UL listed, and RoHS compliant
- Covered by Biamp Systems' 5-year warranty

ARCHITECTS & ENGINEERS SPECIFICATION

The fixed I/O DSP shall be designed exclusively for use with Tesira® systems. The fixed I/O DSP shall support Ethernet connection for programming and control on a RJ-45 connector. The fixed I/O DSP shall have internal DSP processing. The fixed I/O DSP shall include 4 channels of General Purpose Input and Output connection (GPIO) for sending or receiving logic signals. The programming of the GPIO ports shall be software configurable. The fixed I/O DSP shall include a RS-232 connection for control data transmission into or out of the fixed I/O DSP and such operation shall be software programmable. The fixed I/O DSP shall include a Universal Serial Bus (USB) connection on a standard USB-B type connector. The fixed I/O DSP shall be software configurable to stream up to 8 channels of digital USB Class 1 Audio transmission either into or out of the fixed I/O DSP or simultaneous input and output. The fixed I/O DSP shall support port authentication via IEEE 802.1X. The fixed I/O DSP shall provide 12 balanced input connections for receiving of microphone or line level analog audio signals on screw-down, removable connectors. The fixed I/O DSP shall provide 8 balanced output channels for the transmission of microphone or line level analog audio signals on screw-down, removable connectors. Each individual channel shall have its own dedicated connection. The fixed I/O DSP shall provide front panel OLED identification of device power, status, alarm, and activity as well as system-wide alarm. The fixed I/O DSP shall be rack mountable (1RU) and feature software-configurable signal processing, including but not limited to: signal routing and mixing, equalization, filtering, dynamics, and delay, as well as control, monitoring, and diagnostic tools. The fixed I/O DSP shall be CE marked, UL listed, and shall be compliant with the RoHS directive. Warranty shall be five years. The fixed I/O DSP shall be TesiraFORTÉ® AI.

Communications – external device (pass-through, unidirectional or bidirectional) (RS-232/IR over DTP or RS-232/IR over HDBT)

NOTE: Protocol is mirrored between the connected twisted pair endpoints and the "Over DTP" or "Over TP" ports on the IN1608 xi. Signals from a control device pass into each IN1608 xi "Over DTP" or "Over TP" port, are embedded with the twisted pair signal, and sent to individual twisted pair Tx or Rx endpoints for control of remote sink or source devices. The "Over DTP" or "Over TP" IR connections are simply pass-through connections to twisted pair endpoints, and there is no IR insert from any IN1608 xi control port to "Over DTP" or "Over TP" ports. RS-232 can be inserted from the IN1608 xi Ethernet connection.

Serial control pass-through ports	
IN1608 xi input/DTP Tx	RS-232 via (2) 3.5 mm, 5 pole captive screw connectors (shared with IR ports)
IN1608 xi output/TP Rx	RS-232 via (1) 3.5 mm, 5 pole captive screw connector (shared with IR port)
Baud rates	Up to 115200 baud
Protocol	6 - 8 data bits 1 or 2 stop bits no parity (default) even or odd parity flow control = XON, XOFF, none
Serial control pin configuration	1 = Tx, 2 = Rx, 3 = Gnd
IR pass-through control ports	TTL level (0 to 5 V) modulated infrared control from 30 kHz up to 60 kHz

Affordable, Easy-to-Use Switches for Small Business Networks, with Zero Configuration Required

Highlights

- Affordable 10/100/1000-Mbps speeds for even the most bandwidth-hungry applications
- 5- to 24-port models that are desktop or rack mountable
- Power over Ethernet models to provide power to IP phones, access points, and other devices
- Works right out of the box: plug and play and no setup

Product overview

Give your office network a boost of speed and performance at a low price that takes almost no time to set up. Easily build a highly reliable network to connect your computers, printers, copiers, and other office equipment. If your business is like most small companies, you do not have an IT staff to set up your network for you. Now you can have a high-performance, business-class office network that just works, right out of the box, with the Cisco® 110 Series Unmanaged Switches. Users, workgroups, labs, departments, or growing offices can now deliver large amounts of multimedia, image, and video information across the network in almost no time.

Cisco 110 Series Unmanaged Switches deliver basic network connectivity and reliability for small businesses that is easy on the budget and without all the complexity. These switches provide all of the features, expandability, and investment protection you expect from Cisco, with no installation software and nothing to configure. Just plug it in, connect your computers and other business equipment, and get to work.

Cisco 110 Series Unmanaged Switches (Figure 1), part of the Cisco Small Business networking solutions, are a line of unmanaged switches that provide wire-speed Fast Ethernet and Gigabit Ethernet connectivity to connect your small business office. Available in desktop and rack-mount models, these switches are designed to suit any office space with basic network needs and to optimize power efficiency. They use less power and provide the robust, reliable connectivity your business demands, as well as support for advanced features such as Quality of Service (QoS), loop detection, and cable diagnostics, all in a switch that you can set up yourself in minutes. A business-class, affordable network solution, Cisco 110 Series switches bring the proven reliability and investment protection of Cisco networking solutions to your small business.

Features

Cisco 110 Series switches provide an easy-to-use solution for your small business network. They offer:

- **Ease of use:** Cisco 110 Series switches work right out of the box, with no software to install and nothing to configure. Each switch port independently sets itself for the optimal speed and determines whether to run in half- or full-duplex mode automatically. As a standards-based Cisco solution, Cisco 110 Series switches are also designed to immediately accommodate all of the devices in your network, including:
 - Support for 10 Megabits per second (Mbps), 100 Mbps, and up to 1 gigabit per second (1000 Mbps) devices in the same network
 - Automatic cable detection, so you do not have to worry about using the wrong cable type
 - Compatibility with network devices from other vendors
- **Simple setup:** Designed for small office spaces, Cisco 110 Series switches are available in both compact desktop and rack-mount models. The desktop models offer a wall-mount option for discreet mounting under a desk or on the wall of an office or conference room.
- **High performance:** Cisco 110 Series switches deliver the performance you need to run your business applications, including bandwidth-intensive video services, and avoid slow and sluggish networks. They support Gigabit Ethernet speeds, unlocking a new level of capacity and performance in your business network and letting you transfer large files in seconds.
- **Reduced energy costs:** Cisco 110 Series switches are designed to help conserve energy by optimizing power use without compromising performance, which protects our environment and reduces your energy costs. In addition, they support the Energy Efficient Ethernet (IEEE 802.3az) standard, which reduces energy consumption by monitoring the amount of traffic on an active link and putting the link into a sleep state during quiet periods. Most of the switches have no fans, so they run silently and unobtrusively while lowering energy costs.
- **Power over Ethernet (PoE):** Cisco 110 Series switches are available with PoE ports on both Fast Ethernet and Gigabit Ethernet models. This capability simplifies the deployment of IP telephony, wireless, video surveillance, and other solutions by allowing you to connect and power network endpoints over a single Ethernet cable. With no need to install separate power supplies for IP phones or wireless access points, you can take advantage of advanced communications technologies more quickly and at a lower cost.
- **Support for advanced technologies:** All switches include advanced Cisco traffic-handling features to keep your applications running at peak performance. Integrated QoS intelligence on all models automatically prioritizes delay-sensitive services such as voice or video to improve your network's performance. Loop detection helps discover loops in the network that you might have accidentally created, thus avoiding broadcast storms that will bring your network to a stall. Cable diagnostics help to quickly identify and troubleshoot network cabling faults and issues. Fast store-and-forward switching identifies damaged packets and prevents them from being passed on through the network. All of these features run automatically, with no management or configuration required.
- **Peace of mind:** Cisco 110 Series switches deliver the rock-solid reliability you expect from a Cisco switch. The solution has been rigorously tested to make sure of optimal uptime and performance. In addition, the limited lifetime hardware warranty provides peace of mind.

Cisco limited lifetime warranty for Cisco Small Business products

This Cisco Small Business product comes with a limited lifetime hardware warranty. Product warranty terms and other information applicable to Cisco products are available at <https://www.cisco.com/go/warranty>.

Services for Small Business

Reduce downtime with fast, expert technical support and flexible hardware coverage. Cisco Services improve network availability and help you get the most value from your Cisco products. Service plans for your Cisco Small Business products provide more support than a product warranty. A warranty protects you against product defects, and a majority of support calls are unrelated to faulty materials or manufacturing. Most callers ask about product features, technical problems, or how to expand their network.

Cisco offers an unlimited number of calls and no restrictions on call duration, so you can get the help you need and the most from your Cisco product.

For more information about Cisco Services, see <https://www.cisco.com/go/sbs>.

Cisco environmental sustainability

Information about Cisco’s environmental sustainability policies and initiatives for our products, solutions, operations, and extended operations or supply chain is provided in the “Environment Sustainability” section of Cisco’s [Corporate Social Responsibility](#) (CSR) Report.

Reference links to information about key environmental sustainability topics (mentioned in the “Environment Sustainability” section of the CSR Report) are provided in the following table:

Sustainability topic	Reference
Information on product material content laws and regulations	Materials
Information on electronic waste laws and regulations, including products, batteries, and packaging	WEEE compliance

TLP Pro 725M

7" WALL MOUNT TOUCHLINK PRO TOUCHPANEL

The Extron TLP Pro 725M is a 7" wall mount TouchLink® Pro Touchpanel with many enhanced features. Extron redesigned this latest TouchLink Pro Touchpanel inside and out with a new, high-performance quad-core processor, eight times more memory, a higher resolution, 1024x600 edge-to-edge glass capacitive touchscreen built with scratch and smudge-resistant Corning® Gorilla Glass®. The TLP Pro 725M also features the convenience of PoE - Power over Ethernet, which allows it to receive power and communication over a single Ethernet cable.

- ▶ 7" capacitive touchscreen with 1024x600 resolution and 24-bit color depth
- ▶ Newly designed inside and out for the ideal balance of performance and style
- ▶ Gorilla Glass® screen is tough, scratch, and smudge-resistant
- ▶ Faster, quad-core processing and eight times more memory
- ▶ Compatible with all IP Link Pro control processors
- ▶ Power over Ethernet provides power and communication over a single Ethernet cable
- ▶ Light sensor adjusts screen brightness as the ambient room lighting changes

DESCRIPTION

The **TLP Pro 725M** is a 7" wall mount touchpanel that offers stellar performance and superior design. Inside, there's a powerful new quad-core processor and eight times more memory feeding the high resolution 1024 x 600 edge-to-edge glass capacitive touchscreen. The touchscreen, itself, is our most durable yet - built with scratch and smudge-resistant Corning Gorilla Glass. Outside you'll find a stylish, ergonomic enclosure that will complement any contemporary presentation environment.

A host of familiar features provides elegant, simple operation, while PoE, Power over Ethernet streamlines integration by allowing the touchpanel to receive power and communication over a single Ethernet cable.

All TouchLink Pro touchpanels can be customized using Extron GUI Designer software. This powerful interface design software offers ready-to-use templates for a wide variety of rooms and presentation environments.

features.

- **Panel Space:** 12U or 21.00" [533]
- **Overall Height:** 27.125" [689]
- **Overall Depth:** 23.05" [585]
- **Usable Depth:** 20.00" [508], allowing partial extension of equipment into backbox
- **Overall Width:** 23.06" [586]
- **Description:** Wall rack features welded steel backbox and front mounting section. Ships in 2 cartons so backbox can be field installed while front is loaded at the shop.
- **Construction:** Welded 16-gauge certified U.S. steel. Black wrinkle powder epoxy finish.
- **Backbox:**
 - 5.80"D with keyhole mounting slots on 16" centers
 - 10"x10" opening accommodates electrical pull box
 - 1/4-20 ground stud
 - Embossed dimples on back plane for installation of board-mounted accessories
 - Removable top/bottom knockout panels with combination EKO for conduit (1/2"-3/4" and 1"-1-1/2"). Upper KOs for wireless antennae (1/2"). Lower blank project panel.
 - Side locks (2) are keyed differently than optional door.
- **Front Mounting Section:**
 - 17.06"D, welded sides, fully gusseted corners, triple formed (side-to-bottom, side-to-top) wrap design mounts to backbox from inside with 2 heavy duty (self seating, positive locking) spring-loaded L-pins (move pins to change swing orientation). Strength equivalent to 3/16" steel. Front and side vents. Beveled front corners. Roller closure keeps front closed without mandatory locking.
 - Top/bottom KOs for wireless antennae and integral rails on E.I.A. spacing for mounting or lacing.
 - Rack Rails: 1 pair (12U) 11-gauge steel rails with black finish, 10-32 threaded holes and numbered RU increments. Recessed 0.625"
- **Installation:** Minimum clearance to allow mounting section to swing open 90 degrees is 17.26" (+1" for optional door). Mounting section can swing open more than 90 degrees if room is provided.
- **Hardware:** Black pilot point screws with captive washers for quick installation.
- **Compliance:** EIA/TIA compliant. RoHS compliant. UL 2416 Listed in U.S. and Canada.
- **UL Listed Load Capacity:** 150 lbs.
- **Optional:**
 - Surface-mount front door: solid steel, fully-vented steel, or smoked plexiglass (#LFD-12, #LFD-12FV, #LFD-12P)
 - Additional pair of 12U mounting rails (#RRD-12)

a&e specifications

The E.I.A. compliant, UL2416 listed, welded sectional wall rack shall be Lowell #LWR-1223, which shall consist of a backbox and mounting section made in the U.S.A. from 16 gauge certified U.S. steel. Overall measurements shall be 27.13"H x 23.05"D x 23.06"W , providing 12U panel space. The mounting section shall be 17.06"D with triple formed side-to-bottom, side-to-top wrapped construction to achieve strength equivalent to 3/16" thick steel. It shall feature side vents, one pair adjustable mounting rails tapped 10-32, four knockouts for antennas (top and bottom), and integral rails on E.I.A. spacing (top and bottom). The mounting section shall attach to the backbox on the inside with two heavy duty, spring-loaded L-pins (self seating, positive locking), which can be attached on either side to alter swing orientation. The backbox

shall be 5.80"D with keyhole mounting slots on 16" centers, a 10"x 10" rear opening, embossed dimples and lacing points on the back plane, knockout panels with combination knockouts (1/2"-3/4", and 1-1-1/2"), a blank project panel, and two keyed side locks. The rack shall have a black wrinkle powder epoxy finish.

Optional

- The rack shall include a _____ (solid steel, fully-vented steel, smoked plexiglass) surface-mount front door _____ (Lowell #LFD-12, #LFD-12FV, #LFD-12P).
- The rack shall include an additional pair of mounting rails, Lowell #RRD-12.

VFR159i Specifications

FEATURES

- Two-way, full range loudspeaker
- Beamwidth-matching crossover point
- Large, user-rotatable horn for optimized pattern control
- Easy lift handles (Black version only)

DESCRIPTION

The new VFR "i" revision brings the VF concept more fully into the EAW product line.

The VFR159i two-way, full range loudspeaker system includes a direct-radiating, vented, 15-in LF cone transducer and a 1-in exit / 1.75-in voice coil HF compression driver loaded with a large, square, user-rotatable 90x60 or 60x45 coverage pattern horn built on the classic MK Series horns. These horns deliver exceptional high frequency dispersion, and their square shape lets users "rotate the enclosure around the horn" to maintain directivity in a horizontal configuration. The standard horn is field replaceable with an optional 60x45 horn. This change incorporates a passive filter adjustment to maintain consistent acoustic response and smooth beamwidth throughout the crossover region.

Because VF Series full range systems (VFR/VFM) use HF sections similar to those developed for the MK Series, EAW engineers could employ the same revolutionary "beamwidth-matching" internal passive crossover/filter networks that set the MK Series apart from all other two-way systems. If powered by an EAW-specified amplifier or via a UX Series digital signal processor, the VFR159i can enjoy the benefits of EAW Focusing, a technology that eliminates the anomalies inherent in the time domain of any loudspeaker.

The VFR159i black version includes traditional portable features such as a pole-mount cup, parallel NL4 4-terminal connector, barrier strip connector, an optional transformer and handles that accept accessory covers for permanent installation. The white, installation-only versions omit handles and the pole-mount cup but include NL4 connector, barrier strip connector, an optional transformer, and multiple mounting points. The new design leaves the enclosure sides completely smooth and attractive. Optional rigging hardware is available for preconfigured arrays with VFS sub bass systems.

Six year warranty.

NOTES

TABULAR DATA

1. **Measurement/Data Processing Systems:** Primary - FChart: proprietary EAW software; Secondary - Brüel & Kjær 2012.
2. **Microphone Systems:** Earthworks M30; Brüel & Kjær 4133
3. **Measurements:** Dual channel FFT; length: 32 768 samples; sample rate: 48 kHz; logarithmic sine wave sweep.
4. **Measurement System Qualification** (includes all uncertainties): SPL: accuracy ± 0.2 dB @ 1 kHz, precision ± 0.5 dB 20 Hz to 20 kHz, resolution 0.05 dB; Frequency: accuracy $\pm 1\%$, precision ± 0.1 Hz, resolution the larger of 1.5 Hz or 1/48 octave; Time: accuracy ± 10.4 μ s, precision ± 0.5 μ s, resolution 10.4 μ s; Angular: accuracy $\pm 1^\circ$, precision $\pm 0.5^\circ$, resolution 0.5° .
5. **Environment:** Measurements time-windowed and processed to eliminate room effects, approximating an anechoic environment. Data processed as anechoic or fractional space, as noted.
6. **Measurement Distance:** 7.46 m. Acoustic responses represent complex summation of the subsystems at 20 m. SPL is referenced to other distances using the Inverse Square Law.
7. **Enclosure Orientation:** For beamwidth and polar specifications, as shown in Mechanical Specification drawing.
8. **Volts:** Measured rms value of the test signal.
9. **Watts:** Per audio industry practice, "loudspeaker watts" are calculated as voltage squared divided by rated nominal impedance. Thus, these are not True Watt units of energy as defined by International Standard.
10. **SPL:** (Sound Pressure Level) Equivalent to the average level of a signal referenced to 0 dB SPL = 20 microPascals.
11. **Subsystem:** This lists the transducer(s) and their acoustic loading for each passband. Sub = Subwoofer, LF = Low Frequency, MF = Mid Frequency, HF = High Frequency.
12. **Operating Mode:** User selectable configurations. Between system elements, a comma (,) = separate amplifier channels; a slash (/) = single amplifier channel. DSP = Digital Signal Processor. IMPORTANT: To achieve the specified performance, the listed external signal processing must be used with EAW-provided settings.
13. **Operating Range:** Range where the processed Frequency Response stays within -10 dB SPL of the power averaged SPL within this range; measured on the geometric axis. Narrow band dips are excepted.
14. **Nominal Beamwidth:** Design angle for the -6 dB SPL points, referenced to 0 dB SPL as the highest level.
15. **Axial Sensitivity:** Power averaged SPL over the Operating Range with an input voltage that would produce 1 W at the nominal impedance; measured with no external processing on the geometric axis, referenced to 1 m.
16. **Nominal Impedance:** Selected 4, 8, or 16 ohm resistance such that the minimum impedance point is no more than 20% below this resistance over the Operating Range.
17. **Accelerated Life Test:** Maximum test input voltage applied with an EIA-426B defined spectrum; measured with recommended signal processing and Recommended Protection Filter.
18. **Calculated Axial Output Limit:** Highest average and peak SPLs possible during the Accelerated Life Test. The Peak SPL represents the 2:1 (6 dB) crest factor of the Life Test signal.
19. **High Pass Filter:** This helps protect the loudspeaker from excessive input signal levels at frequencies below the Operating Range.

GRAPHIC DATA

1. **Resolution:** To remove insignificant fine details, 1/12 octave cepstral smoothing was applied to acoustic frequency responses and 1/3 octave cepstral smoothing was applied to the beamwidth and impedance data. Other graphs are plotted using raw data.
2. **Frequency Responses:** Variation in acoustic output level with frequency for a constant input signal. Processed: normalized to 0 dB SPL. Unprocessed inputs: 2 V (4 ohm nominal impedance), 2.83 V (8 ohm nominal impedance), or 4 V (16 ohm nominal impedance) referenced to a distance of 1 m.
3. **Processor Response:** The variation in output level with frequency for a constant input signal of 0.775 V = 0 dB reference.
4. **Beamwidth:** Average angle for each 1/3 octave frequency band where, starting from the rear of the loudspeaker, the output first reaches -6 dB SPL referenced to 0 dB SPL as the highest level. This method means the output may drop below -6 dB SPL within the beamwidth angle.
5. **Impedance:** Variation in impedance magnitude, in ohms, with frequency without regard to voltage/current phase. This means the impedance values may not be used to calculate True Watts (see 9 above).
6. **Polar Data:** Horizontal and vertical polar responses for each 1/3 octave frequency band 100 Hz to 16 kHz or Operating Range.

Wireless Microphone Systems

ULTRALINK USB Wireless Microphones ULM200USB/ULM100USB

ULTRALINK ULM200USB — High-Performance 2.4 GHz Digital Wireless Dual Microphone System

- High-performance 2.4 GHz digital wireless microphone system with 2 handheld microphones and USB receiver

ULTRALINK ULM100USB — High-Performance 2.4 GHz Digital Wireless Microphone System

- High-performance 2.4 GHz digital wireless microphone system with handheld microphone and USB receiver

Common Features

- License-free 2.4 GHz band wireless technology
- Automatic pairing for easy and intuitive setup
- Manual pairing for new or replacement microphones
- Dual mode analog/USB class-compliant digital audio interface with automatic sensing
- Robust error detection and correction provides high rejection of interference
- Integrated volume up and down buttons on handheld microphone for easy volume control
- Panic mute function
- Low battery indication
- Multifunction LED status indication
- Receiver dongle powered via USB interface
- High-quality components and exceptionally rugged construction ensure long life
- Conceived and designed by BEHRINGER Germany

Once again BEHRINGER breaks the affordability barrier—with the new ULTRALINK ULM Series USB Wireless Microphone Systems. Now you are free to work the room to your heart's content, without the hassle and restriction of cables underfoot. Highest-quality sound is provided by the dynamic hand-held mic thanks to its built-in transmitter, which operates in the license-free 2.4 GHz range. And because the receiver can be connected directly to your PC/Mac computer's USB port, you can record directly into your favorite DAW application.

Interference-Free Performance

Our state-of-the-art transmitters and receivers operate in the 2.4 GHz frequency band, which is well out of the way of TV stations and cell phone towers, two of the main culprits that wreak havoc in the wireless zone. And because it is digitally encrypted, your signal gets through in all its pristine, high-definition quality, without the random artifacts that often plague other wireless systems.

Extended Battery Life

Replacing batteries in wireless mics can get expensive really fast—and having them die in the middle of your set can be a showstopper! That's why we devoted extra time in developing ULM USB Series, ensuring that battery life is extended as long as possible. You get an honest 8 hours performance time from a pair of AA alkaline batteries, which are available virtually anywhere on the planet.

Convenient Control

It can be a real hassle running back and forth to get your volume set just right, so we put easy-to-operate Volume Up and Down buttons right on the microphone body. And should you accidentally wander into the "Feedback Zone", we've included a handy Panic Mute function that engages when you press and hold the Volume Down button.

Ready for the World

Operating in the 2.4 GHz band allows BEHRINGER ULM Series USB Wireless Microphone Systems to be used across the globe without any special licensing requirements.

Extraordinary Value

ULM Series USB Wireless Microphone Systems are only available from BEHRINGER, the premier audio manufacturer recognized worldwide for outstanding build quality and exceptional value. Visit your local authorized dealer today and see just how easy and affordable it is to hop on the wireless bandwagon.

DN-300RMKII Solid-State SD/USB Audio Recorder

Key Features:

- Records WAV and Mp3 files to SD and USB media simultaneously
- Simple and easy to use
- Powers-up in record-ready mode
- Dual Stereo & Dual Mono modes for recording -10dB safety tracks on the same media
- Balanced and unbalanced inputs and outputs
- Compact 1RU design

Overview:

The DN-300RMKII records to both SD and USB media simultaneously – perfect for recording conferences where the client needs a copy of the recording after the event. With outstanding ease-of-use and simple operation, anyone can use the DN-300RMKII right out of the box and record to SD, USB or both. Utilizing Dual Mono or Dual Stereo modes, the ability to record a second mono or stereo file at -10dB on the same media is supported - even when recording to both SD and USB at the same time. The DN-300RMKII is exactly what the market is looking for in terms of a simple but high-quality recording solution for commercial applications. The DN-300RMKII gives installers and contractors the flexibility and convenience they need for total commercial recording capability.

Specifications:

- Digital Audio System
 - System:
 - Solid-state SD/USB audio recorder/player
 - Compatible Media (FAT 16, FAT 32)
 - USB Device (mass storage class)
 - SD/SDHC
 - SDXC
 - Supported File Formats
 - MP3
 - Sampling frequency:
 - 44.1 kHz
 - Bit rate:
 - 192, 256 kbps (recording); 64 - 320 kbps and VBR (playback)
 - Format:

FEATURES OF THE H6

- Interchangeable input capsules
- Six-track simultaneous recording
- Four mic/line inputs with XLR/TRS combo connectors
- Gain control knobs and -20dB pads for each input
- Supplied XYH-6 X/Y capsule provides secondary input via a stereo 1/8" Mic/Line In mini phone jack
- Phantom power for all main inputs: +12/+24/+48V
- Large full-color, angled LCD display
- Records directly to SD, SDHC and SDXC cards up to 128GB
- Up to 24-bit /96kHz audio in BWF-compliant WAV or a variety of MP3 formats
- Auto-record, Pre-record and Backup-record functions mean that you'll never miss that perfect take
- Built-in effects, including low-cut filtering, compression, and limiting
- Multichannel and stereo USB audio interface for PC/Mac/iPad
- Accepts standard AA alkaline or NiMH rechargeable batteries
- Over 20 hours of operation with 4 AA alkaline batteries

- Ideal for guitarists, keyboard players, drummers and others who need the use of their hands during performance
- Low-visibility headband and cushioned support pads provide a stable, comfortable fit
- Pivot-mounted flexible mic boom descends from left or right side
- Hypercardioid polar pattern improves isolation of desired sound source
- Hi-ENERGY[®] neodymium element for articulate vocal reproduction
- Rugged 4-pin cH-style screw-down connector provides secure connection to Audio-Technica body-pack wireless transmitter
- Also available as: **PRO8HEx** - 7.2' (2.2 m) cable permanently attached between microphone and XLRM-type connector

SPECIFICATIONS

Element	Dynamic
Polar Pattern	Hypercardioid
Weight	60g
Dimensions	Microphone: 0.80" (20.4 mm) diameter Headset: 4.72" (120.0 mm) nominal at widest point, 3.17" (80.5 mm) flexible boom
Output Connector	Rugged 4-pin cH-style screw-down connector

Portable rack includes front and rear doors with key locks for security.

FEATURES:

- **Panel Space:** 21U or 36.875" [937]
- **Height:** 42.875" [1089] rack
48.01" [1219] rack w/casters
- **Depth:** 22.00" [559] rack
19.34" [491] usable
- **Width:** 23.06" [586] rack
- **Construction:** Fully welded certified U.S. steel, 16-gauge frame and 14-gauge base reinforced at all load-bearing junctions. Black wrinkle powder epoxy finish. Beveled edge corners.
- **Front:** Reversible (left or right swing) solid steel surface-mount door, with recessed handle and key lock, extends 1" from frame. Vents in frame above and below door.
- **Rear:** Reversible recessed door with upper/lower vents and key lock. Knockouts in frame above and below door feature combination EKO's for conduit (1/2"–3/4" and 1"–1-1/2"). Top panels also include KO's for wireless antennae (1/2").
- **Sides:** Welded sides feature handles and upper and lower vents.
- **Bottom:** Solid bottom. Set of 4 heavy duty swivel casters (2 locking) ship inside rack for field installation. Casters add 5.13" to overall rack height.
- **Top:** Solid steel top with dimples to field-mount optional overhanging laminate top (order separately).
- **Cable Management:** Combination knockouts in rear panels. Generous space for managing wire between front rails and front-to-rear rail supports.
- **Rack Rails (21U fully adjustable):** One pair 11-gauge steel 10-32 threaded rails with black finish and numbered RU increments.
- **Hardware:** Black pilot point screws with captive washers for quick installation.
- **Compliance:** EIA/TIA compliant. RoHS compliant. UL 2416 Listed in U.S.A. and Canada.
- **UL Listed Load Capacity:** 900 lbs. [408 kg]

A&E SPECIFICATIONS:

The EIA/TIA compliant, portable 19" equipment rack shall be Lowell model LPR-2122 with overall dimensions of 42.875"H (without casters) x 22.00"D x 23.06"W; usable height of 21 rack units, and usable depth of 19.34". It shall include one-pair swivel and one-pair swivel/locking casters which shall be field installed and increase overall height 5.13". Rack construction shall be fully welded certified U.S. steel with 16-gauge frame and 14-gauge bottom reinforced at load-bearing junctions, all with black wrinkle powder epoxy finish. Welded sides shall feature handles and vents. The rack shall include a recessed rear door with upper/lower vents and key lock, and a solid steel surface-mount front door with integral handle and key lock. The rear frame shall feature removable knockout panels above and below door with 1/2"–3/4" and 1"-1-1/2" EKO's for conduit—upper panels shall also include 1/2" KO's for wireless antennae. One panel below the door shall be blank. The front frame shall feature vents above and below the door. Rack top and bottom shall be solid steel. The rack shall include one pair of (21U) adjustable 11-gauge steel rails tapped 10-32 on 19" E.I.A. spacing with black finish and numbered rack unit increments. The UL 2416 Listed rack shall be manufactured in the U.S.A. with load capacity of 900 lbs.

OPTIONS: (order separately)

- **RRD-21:** Additional pair of 21U rails.
- **KOP-N:** Pair of panels for specialty connectors (Neutrik D series, Switchcraft HPC or E series) are sized to replace rear knockout panels.
- **KOP-AC1502:** Knockout panel with two 15A outlets and 6' cord (replaces one rear panel).
- **LGT-22:** Premium Graphite Grey laminate top with rubber edge molding overhangs rack (1"H x 24.06"D x 24.69"W).

E2-HDSEM-M Technical Specifications 0.5 to 3.0 meters

Commercial Grade High Retention HDMI Cable Assembly

Rev. 140915

Liberty's E2-HDSEM-M High Speed HDMI® with Ethernet cable assemblies are designed with consideration to the custom installation market. A high quality, heavily shielded digital transport cable mated with approved patented high retention HDMI connector's delivers excellent performance. The cable is third party ATC verified to the highest HDMI cable standard, High Speed HDMI® with Ethernet.

Key Features:

- High speed HDMI with Ethernet
- Low profile 26mm head depth
- High retention HDMI plugs
- UL/CSA listed for in-wall use
- Convenient cable lengths

The E2 series is robustly constructed with 28 AWG tinned annealed copper conductors on the TMDS pairs. The overall cable is dual shielded with a full coverage foil shield and an 85% coverage braided shield. Unlike many cables on the market, the connectors feature full shielding over the solder joints instead of drain wire under a pre-mold. These cables are fully shielded from connector shroud to connector shroud. All contact surfaces are gold plated for conductivity, durability, and resistance to tarnish. The high retention connectors increase the standard HDMI holding force by a factor of 3, up to 12 lbs.

Lengths from 0.5 to 3.0 meters are passive cables. There are No equalization chipsets and directional requirements on These lengths. These general purpose HDMI cables feature UL ratings on the bulk cable for CL2 and Canadian FT4, this Is permissible for concealed installations per the requirements of the National Electric Code®. The product is Compliant to the requirements of the EU RoHS-2 2011/65/EU standard.

Key Applications:

- Commercial Audio/Video
- Residential Audio/Video
- Concealed (in-wall) installs
- Fixed installations

DTP T HWP 4K 231 D

DTP TRANSMITTER FOR
HDMI – DECORATOR-STYLE
WALLPLATE

DTP
SYSTEMS

4K UHD

The Extron DTP T HWP 4K 231 D is a single-gang decorator-style transmitter for sending HDMI, analog audio, and bidirectional control signals up to 230 feet (70 meters) over a shielded CATx cable to Extron DTP™-enabled products. It is designed for efficient use within configurable rooms and environments offering limited space. The HDCP-compliant transmitter features a convenient one-gang form factor that offers maximum placement flexibility.

- ▶ Transmits HDMI plus control and analog audio up to 230 feet (70 meters) over a shielded CATx cable
- ▶ Supports computer and video resolutions up to 4K, including 1080p/60 Deep Color
- ▶ Extron XTP DTP 24 shielded twisted pair cable is strongly recommended for optimal performance
- ▶ DTP™ output is compatible with HDBaseT-enabled devices
- ▶ Accepts additional analog stereo audio signals
- ▶ Bidirectional RS-232 and IR pass-through for AV device control
- ▶ Remote power capability
- ▶ Supported HDMI specification features include data rates up to 10.2 Gbps, Deep Color up to 12-bit, 3D, HD lossless audio formats, and CEC pass-through
- ▶ Supports EDID and HDCP transmission
- ▶ Compatible with all DTP 230 Series receivers and DTP-enabled products
- ▶ Mounts in an included single-gang decorator-style wallplate
- ▶ Highly reliable, energy-efficient external universal power supply included

Extron Electronics
INTERFACING, SWITCHING AND CONTROL

DESCRIPTION

The Extron **DTP T HWP 4K 231 D** is a single-gang, decorator-style transmitter for sending HDMI, audio, and bidirectional RS-232 and IR signals up to 230 feet (70 meters) over a shielded CATx cable to Extron DTP-enabled products. The one-gang form factor provides maximum space efficiency in wall mount, floor box, and furniture mount applications. The DTP T HWP 4K 231 D accepts analog stereo audio signals for simultaneous transmission over the same shielded twisted pair cable. It supports video signals at resolutions up to 4K, including 1080p/60 Deep Color. The transmitter features remote power capability, bidirectional RS-232 and IR pass-through for remote AV device control, and an HDBaseT output mode for compatibility with any HDBaseT-enabled display. The single-gang wall-mountable design of the DTP T HWP 4K 231 D provides the convenience of placing input connections precisely where they are needed.

The DTP T HWP 4K 231 D enables the reliable transmission of HDMI signals, supporting Deep Color up to 12-bit, CEC pass-through, and embedded HD lossless audio formats. DDC communication of EDID and HDCP is continuously maintained between a source and display, ensuring direct compatibility and optimal signal transmission between devices. For added installation flexibility, the transmitter can be remotely powered over the shielded twisted pair cable by a DTP-enabled product. The DTP T HWP 4K 231 D can be integrated with an Extron DTP CrossPoint® 84 Presentation Matrix Switcher, or other DTP-enabled products to support sources at remote locations.

- Stereo Inputs to Stereo Outputs (D SERIES-CIJ3D)
- Stereo Inputs to Mono Output (D SERIES-CIJ3)
- Stereo Inputs on RCA Jacks and Stereo Mini-Jack
- Unbalanced to Balanced Conversion Without Gain
- Transformer Isolation for Unbalanced Line Inputs
- Hum Cancellation on Unbalanced Line Inputs
- Line-Level Output to Feed 10 kΩ Equipment Inputs
- Output Connections on Detachable Terminal Block
- Mix Stereo Inputs to Mono Balanced (D SERIES-CIJ3)
- Available in Stainless Steel, Black and White

The D-CIJ3 and D-CIJ3D are Decora®-compatible audio input accessories from Radio Design Labs. All metal enclosures are attractively finished in white, black or brushed stainless steel to complement the decor encountered in commercial environments. Custom labeling is available at www.rdlnet.com.

D SERIES-CIJ3: The -CIJ3 is the ideal choice in installations requiring the passive mixing of two unbalanced line-level audio sources to feed a mono balanced (or unbalanced) audio line.

The -CIJ3 is a complete unbalanced line-level audio input module. The front panel features two gold plated phono jacks and a single stereo mini-jack, intended for mono or stereo consumer level sources. An input signal may be connected to either the phono jacks or to the mini-jack. The left and right signal inputs are combined and balanced through audio transformers configured to reject induced hum. A mono line-level output is provided on the rear-panel detachable terminal block for connection to a 10 kΩ or higher input impedance line-level module or equipment input.

D SERIES-CIJ3D: The -CIJ3D is the ideal choice in installations requiring stereo unbalanced line-level audio sources to feed stereo balanced (or unbalanced) audio lines.

The -CIJ3D is a complete unbalanced line-level audio input module. The front panel features two gold plated phono jacks and a single stereo mini-jack, intended for mono or stereo consumer level sources. An input signal may be connected to either the phono jacks or to the mini-jack. The inputs are balanced through audio transformers configured to reject induced hum. A stereo line-level output is provided on the rear-panel detachable terminal block for connection to 10 kΩ or higher input impedance line-level module or equipment inputs.

Wherever consumer format audio signals need to be connected to a professional audio system, the -CIJ3 and -CIJ3D are the ideal choices. Use them individually or in conjunction with other RDL products as part of a complete audio/video system.

Attero Tech by QSC Axiom BT1

Bi-directional Bluetooth audio wall plate

Features

- Provides simple, bi-directional Bluetooth connectivity (2 x 0, 1 x 1, or 1 x 0)
- Simple, one-button pairing/connect process with LED connection status indicator
- Provides a wireless call bridging solution for conferencing systems with dedicated microphones and speakers
- 3.5 mm TRRS stereo analog audio jack allows for connecting to smart devices and media players
- Defeatable pairing button for restricted use applications with third-party control systems
- Single-gang, Decora form factor
- RS-232 control over volume and mute
- Ships with both black and white Decora plates and fascia inserts

Axiom BT1

Applications: Meeting Spaces • Restaurants • Retail • K-12

Attero Tech by QSC Axiom Series products provide simple, flexible and cost-effective solutions for point-to-point analog audio extension over non-networked CAT-5 technology. The Axiom Series combines a single-gang USB, Bluetooth or XLR wallplate with an audio expander to offer easy integration of portable audio devices into an installed AV system, mixer or other audio destination.

Axiom BT1 features two-way Bluetooth connectivity and a 3.5 mm stereo audio connector, allowing users to easily connect consumer-grade devices to the room's audio system for music playback or Bluetooth conference call bridging.

LANmark-1000 Enhanced Category 6 Plenum Rated

LANmark-1000 Plenum
Part Number: 10032094

LANmark-1000 has been improved to offer best-in-class electrical performance. Berk-Tek's engineers completely redesigned LANmark-1000 so that all crosstalk parameters could be improved by four dB. As a result, the Power Sum Attenuation to Crosstalk ratio (PSACR) is nearly 3 times better (at 250 MHz) allowing for much greater signal strength and less vulnerability to noise interference. At Berk-Tek, we understand that your business runs through us.

Description

Berk-Tek LANmark-1000, Performance Guaranteed

Before any cable can display the **Berk-Tek LANmark-1000** legend, it must pass factory tests with **a minimum of 5dB of crosstalk margin beyond the CAT 6 standard for NEXT, PSNEXT, ACR and PSACR**. If the margin is missing, so is the legend. That is our guarantee to you.

Your business demands continuous performance from your IT network, so our specifications aren't simply numbers on the page. They define the way that we do business. This means that you are **guaranteed** industry-leading performance and quality for all Berk-Tek products.

Some other manufacturers talk about "typical" values, at Berk-Tek, we hold ourselves to a higher standard. We won't talk about typicals, we talk about what is true, guaranteed, and independently verified.

Keep your business running by relying on Berk-Tek.

Berk-Tek ...Because Your Business Runs Through Us.

Construction

23 AWG bare copper wire insulated with FEP. Two insulated conductors twisted together to form a pair and four such pairs laid up with crossfiller to form the basic unit, jacketed with flame-retardant PVC.

Flame Rating

Plenum - NFPA 262, CMP, UL Listed

Features

- Full Power Sum Performance
- Documented balance characteristics (LCL, LCTL)
- ETL verified to ANSI/TIA/EIA-568-C.2
- RoHS Compliant

Benefits

- Optimal support for Gigabit Ethernet with headroom
- Power sum characterization gives highest performance using existing applications
- Provides additional bandwidth required for future applications
- Addition of balance requirements improves overall cable performance and reduces cable emissions which results in reduced transmission errors
- Characterized to 550 MHz, 300 MHz greater than the standard

Standards

International ISO/IEC 11801

National ANSI/TIA-568-c.2 Category 6; UL 444
